Short Description

HHO – "Brown's Gas" – Energy of the Future

A Presentation by Christoph Beiser (Translation by Ulrike Granogger)

Description

HHO – "Brown's Gas" – Energy of the Future

A Presentation by Christoph Beiser (Translation by Ulrike Granogger)

A fascinating and dynamic presentation by Christoph Beiser – Austrian pioneer of HHO (Brown's Gas) energy research and the building of hydrogen fuel cells.

The efficiency of his Dry Cell is as yet unequalled. Most notably, this fuel cell for home use is fully automatic and computerized

Christoph Beiser succeeded in making 'free' energy production available for everyone.

Presentation given at the 2013 Congress of the Academy For Future Science in Dornbirn, Austria. German presentation with English translation by Ulrike Granogger.

DVD - 55 Minutes
