Description

A Study of the Nag Hammadi Scripture by Drs. J.J. & Desiree Hurtak

This lecture presentation by Drs. J.J. Hurtak and Desiree Hurtak takes us into the work of the Divine Mother or "feminine principle" of the Godhead as one of the more important teachings for our time.

Using teachings from the Nag Hammadi Library, specifically "The Thunder Perfect Mind", there is a greater understanding of the inner Divine "mothering nature" of creation. This higher nature is a nature beyond duality. In this text there is a language similar to Buddhist expressions of the Divine both within and without human nature simultaneously.
